# **Using Livelox**

An Online Tool for Visualizing Orienteering Results

Examples from Greater Phoenix Orienteering

### Introduction

Livelox is an online tool for analyzing orienteering results. The tool, created by the company Knowit Uppsala AB in cooperation with the Swedish Orienteering Association, is available through a web browser. The instructions below are meant to provide a quick example of using Livelox. Additional details are available at Livelox.com.

#### Tools

The following tools were used for this example.

• Version 66.0.3359.139 (Official Build) (64-bit)

### **Quick Start**

• Use a web browser to log in to your livelox.com account.

Setting up an account is free. We do not currently subscribe to Livelox. (Maybe someday we'll get electronic timing for more detailed course analysis.)

• List the club's events.

Select the My club's events tab.

• For now, it appears you can visualize a mass start simply by pressing the "Go" arrow. The mass start option is not available if you are not logged in. For now, the mass start visualization does not seem to require a subscription. This could change in the future.
